### **Ateliers Pictet makes glassworks for the Guerlain concession at this most iconic Parisian department store**

Guerlain presents its new architectural signature at the landmark department store in the centre of Paris.

Ateliers Pictet worked closely with Guerlain's Artistic, Architecture and Design department to produce three works in glass, each with a radial motif. Engraving, chiselling and gilding on a transparent background introduce light and create an impression of depth.

In a burst of glass and gold, Ateliers Pictet has created a dazzling backdrop for the celebrated perfumer's creations.
