

**Atelier Bernard Pictet has created a glass screen  
for a Parisian apartment  
with interior design by Brigitte Saby**

Interior designer Brigitte Saby set out to create a "visual event" that would define two distinct areas without altering the overall volume of this spacious reception room. So as to ensure a sense of continuity between the living and dining areas, Atelier Bernard Pictet produced an opalescent and transparent laminated glass screen that suggests cascading water, inset with gypsum supplied by Jallu Ebénistes.
