## Furniture by Bernard Pictet in collaboration with a cabinetmaker and an artisan metalworker at the "Révélations" Biennial, at the Grand Palais in Paris.

---

As a specialist in the creation and making of works in glass for interior design and decoration, Atelier Bernard Pictet devotes a large part of its production to wall treatments, panels and doors.

At the "Révélations" Biennial, held in May inside the Grand Palais in Paris, the studio presented a different facet of its expertise in the form of furniture, designed and made in collaboration with other highly skilled artisans: Ludwig & Dominique for cabinetry and VLD Orgiazzi for metalwork.

### "LOUIS" MIRROR

The wood frame for this impressive wall mirror, which measures 120 cm in diameter, was designed and made by Ludwig & Dominique.

The 50-mm half-round moulding is finished with radial straw marquetry.

The mirror, which measures 50 cm across, is surrounded by chiselled glass in a sunburst pattern, with a reparure of gold leaf, brown gold leaf and brown silver leaf in complete harmony with the coloured straw.

# “IMPALA” DESK and “DIEGO” TABLE

## « IMPALA » DESK

The Impala desk is designed and made by Ludwig & Dominique in tamo, a precious Japanese wood.

The desk top by Bernard Pictet is in 19 mm-thick sawn glass with a reparure of black silver leaf and gold leaf.

The tapered brass legs and metal frame have been given a mottled anthracite grey patina. The inside of the legs is set with tamo wood.

**Dimensions:** 1,500 mm x 650 mm x 760 mm high

## « DIEGO » TABLE

The wrought iron legs are shaped using hot upset forging, hammered then patinated.

The table top is a 15 mm-thick glass slab which has been finely engraved then chiselled. This creates a multitude of silvery specks that produce a subtle shimmer against the mat silver background.
